YCBS 299 - Data Science Capstone Project

Business Problem Framing Report

Instructions: Prepare a 2 - 4 page report about the business problem you will solve during the course.

Cover the following aspects:

Aspects	Expectations
Business problem	Describe of the problem, difficulty, or situation the team wants to try to solve or analyze.
Business problem rationale	Justify why solving the identified business problem is relevant using research articles, existing knowledge, and other resources. Links to the references used are provided.
State-of-the-art review	Describe how the problem has been solved previously. Search for scientific articles and books that examine comparable analyses and models.
